EDUCATION

B.S., Computer Science

University of Illinois Urbana-Champaign

Aug 2017 - May 2021

E GPA: 4.00/4.00

EXPERIENCE

Research & Data Analysis Intern

EarthSense

Sep 2018 - Present

O Champaign, IL

- Researched and developed computer vision algorithms to recognize key plant traits through an autonomous robot platform.
- Retrained a CNN that categorizes the heading of wheat into 3 classes with 90% accuracy.
- Trained a CNN on a 90-10 split dataset that classifies the lodging of wheat with 80% accuracy. I proposed additional data collection to address shortcomings of the model.
- Trained and deployed a TensorFlow model to detect and count plant stems with 96% accuracy.
- Constructed a data visualization prototype for efficient delivery of analysis to customers.

Software Engineering Intern

SwarmRobotix

May 2018 - Aug 2018

♥ Naperville, IL

- Worked in a team of 5 people to design software architecture for an autonomous swarm of robots.
- Collaborated with 2 people to develop vision algorithms with OpenCV that detected corner castings.
- Researched Convolutional Neural Networks to improve vision accuracy.
- Implemented SLAM with A* path planning on a TurtleBot for real-time navigation in the environment.

Undergraduate Research Assistant

Distributed Autonomous Systems Laboratory

Q Urbana, IL

- Improved a fully-autonomous robotic system that phenotypes a plot of crops (TerraSentia).
- Wrote scripts to automatically update individual robots to the latest software
- Developed a user-facing configuration page on Android that sets the data mode of the robot.

COURSES

- Data Structures, Algorithms, Architecture
- Calculus, Linear Algebra, Discrete Structures

PROJECTS

CU-Recycle

- Developed a convolutional neural network to determine if an item is recyclable in the Urbana-Champaign area. The network was trained with Keras and then ported to TensorFlow Lite.
- Different lighting, object variety, and recyclability were the major challenges.
- Android App launched on the Google Play Store under my developer name, smApps.

FaceTunes

- An Android application that plays music based on detected mood.
- Microsoft Machine Learning API determines emotions present in a selfie.
- Strongest emotion correlated to a Spotify playlist.

LEADERSHIP

Engineering Freshmen Council

2017 - 2018

IT Chair

- Redesigned the EFC main website.
- Helped coordinate Freshmen-Week events.

iRobotics MRDC

2017 - 2018

Software Lead

- Fully designed the robot's intake system in CAD.
- Developed and implemented the robot's codebase for communication and control.

HONORS & ACHIEVEMENTS

- CU-Recyle won 2nd place at a Research Park Hackathon (PygHacks)
- James Scholar academic honors
- Tau Beta Pi engineering honors society member

SKILLS

C++, Python, Java, Android OpenCV, Keras, ROS TensorFlow
